TO THE POINT

If you're about to fly out of the door and notice you're looking a little, well, forlorn, reach for the liquid eyeliner. Not only will it give your appearance an instant boost (liquid eyeliner always looks badass: fact), but a neat tick applied at the outer corners can lift your eyes and elongate their shape – hello, instant facelift.

HOW TO Deveney promises that liquid eyeliner is easy to master. "You need to choose a product with a firm nib, like a felt tip, rather than a brush," she explains. "Starting at the inner corner of the eyes, draw three-quarters of the way along each lash line. Then, looking in the mirror, draw a dot where you want the flick to finish on the side of each eye – make sure they're level – and join up the lines with the dots. Easy, right?" Try Max Factor Masterpiece High Precision Eyeliner, £7.99. It's super-pigmented and lasts up to 24 hours.
